Protected Trust™

Security	Intelligence	Compliance

Secure email is becoming more critical for organizations as risks of data breach, data interception, and associated legal and financial liabilites are only increasing in the businessworld. With existing and pending aggressive Regulatory, Federal and State Privacy laws, fines are being issued daily in several industries. Traditionally, secure email solutions have been costly, cumbersome, and experience a very low user adoption rate.

Protected Trust offers the simplest, easiest, and one of the most secure messaging systems in the world. Offered as a SaaS solution, Protected Trust offers organziations a branded solution deployed within hours, that works seamlessly within MS Outlook, Web Browsers, and Mobile devices. However with Protected Trust, the real secret to success is with it's Business Intelligence which increases User Adoption, and transforms how you communicate as an organization.

Security:
- ✔ 2 Levels of Encryption (128-bit SSL & 256-bit AES)
- ✔ NIST-Certified Key Management Servers (FIPS 140-2 L3)
- ✔ Unique Out-of-Band Authentication and Identity Verification (SMS/Phone/Operator)

Compliance:
- ✔ Enable compliance with HIPAA/HITECH, PCI, FFIEC, CJIS 5.0, Red Flags, SB-1386, 201 CMR 17, NRS-597.970, and more

Intelligence:
- ✔ Uses your existing email address & infrastructure
- ✔ Branded, Easy to Use, and requires no Downloads
- ✔ Full Audit Trail & Real Time Tracking of all messages (Read, Reply, Forward, etc.)
- ✔ Preset Message Auto-Expiry (24 hrs. - 10 years)
- ✔ Gigabyte File Size Delivery (20 GB/message)
- ✔ Universal Acces - MS Outlook 2003/07/10 Plugin, Secure Web Client, Secure Mobile Cient, iPhone, iPad, Android App, and more

Protected Trust ™

Explore some of Protected Trust's Feature Highlights.

Simple & Easy to Use:

You can have the best technology in the world, but if it isn't simple enough, then users won't adopt it. With Protected Trust, it was designed from the ground up to be one of the simplest systems available.

### Free Outlook Plug-in & Mobile Apps

One of the trademark features of the Protected Trust Platform is a fully integrated Outlook Plug-in and Mobile device support. The Microsoft Outlook Plug-in works seamlessly with Outlook 2003, 2007, and 2010 (32 & 64 bit). With mobile web client connectivity, and native Mobile applications, users can now access their secure messages on the go with their iPhones, iPads, and Android devices.

Real Time Tracking & Large File Size Delivery

With the combination of gigabyte-file size attachments and real-time tracking, companies can benefit by becoming paperless, more efficient, and saving costs across their business. Utilizing Protected Trust for digital packaging ensures real-time delivery of your business communications through their standard email client, with an Audit Trail more robust and intelligent than using a same-day courier service.

Unique Out-of-Band Identity Verification

How can you verify the person you sent sensitive information to is really that person? Protected Trust includes multiple methods to eliminate Privacy and Identity Theft by verifying the identity of the person you are sending a message to. Unique phone verification allows for easy and powerful options to receive an automated phone call or unique text message to validate your identity. Once the Identity has been verified, it never has to be done again!

The Power of Recall

Ever wish you could Recall a message you already sent? Protected Trust provides you with 'cheap insurance' by allowing secure messages to be Revoked (recalled) regardless of who it was sent to, when it was sent, and even if the person has already opened and viewed the content and its attachments. This unique functionality works with every email address, and there is no worry about breaking any privacy laws.
